Altered endometrial receptivity causes failure of IVF/ICSI in cases with tubal factor infertility

Published On: September 12, 2018 | Pages: 001 - 005

Author(s): Gunjan Sabherwal* and Sonia Malik

Objectives: To study the prevalence of non- receptive endometrium in patients with tubal factor infertility and to compare that with patients with infertility due to other causes. Further, to analyse the association between endometrial non-receptivity in patients with tubal factor infertility (cases), and their previous history of diagnosis and treatment of genital tu ...
