Higher levels of Hepatocyte Growth Factor (HGF) in human seminal plasma in comparison with blood plasma and negative association with several motile sperm cells

Published On: July 19, 2023 | Pages: 008 - 013

Author(s): Anders Larsson*, Lena Carlsson, Rasha Khierallah, Jan Holte and Theodora Kunovac Kallak

Context: Semen is a complex fluid with many functions, some of them well-known, others more obscure. Aims: The aim of this study was to investigate the levels of Hepatocyte Growth Factor (HGF) in human seminal plasma in comparison with blood plasma levels. Methods: HGF concentrations were measured in seminal plasma from 40 men utilizing commercial ELISA kits. Bloo ...

Effects of prepubertal to peripubertal exposure of triclosan on the reproductive health of the young male laboratory mice

Published On: June 26, 2023 | Pages: 001 - 007

Author(s): Shobha Raj and Poonam Singh*

Over the last few decades, a massive increase in environmental toxicants has played a significant role in causing hindrance in the process of sexual maturity, leading to impaired reproductive health. Several toxicants are existing in the environment because of rapid industrialization, agricultural activities, and urbanization that act as endocrine disrupting chemicals ...
