Preliminary Results of the Value of Diagnostic and Operative Laparoscopy in the Assessment of Female Infertility in 33 Patients

Published On: November 22, 2024 | Pages: 008 - 011

Author(s): Djelti Sihem* and Benmoumen Yassine Mohammed

Infertility is defined as a disease of the female or male reproductive system; it is the inability to conceive a child after a year of unprotected sexual intercourse. It constitutes a real public health problem today due to its prevalence, the generalization of its distribution, and the difficulties inherent in its management. According to the World Health Organizatio ...

Pollen Characteristics of Diploid and Tetraploid Grape Cultivars

Published On: August 17, 2024 | Pages: 001 - 007

Author(s): Zeki Kara*, Mohammed Salah Mohammednoori Fakhar and Kevser Yazar

For a successful grapevine breeding program, pollen viability, germination ability, and cultivar compatibility information are of vital importance. In this study, pollen viability, germination rates, pollen tube lengths, and pollen tube diameters of three grape cultivars [Kyoho (4n), Eki Kara (2n), and Gök Üzüm (2n)] were investigated. Pollen viability rates were det ...
